Abstract (en)

[origin: EP3616933A1] An apparatus for heat treatment of sheets (S) that are supported on a moving belt (10), wherein the sheets (S) are pressed against a support surface of the belt (10) and the belt is supported on a heat conductive stationary support structure (16), characterized in that the heat conductive support structure (16) is elastically biased against the belt (10) with a biasing force (F1) and a compliance limiting mechanism (20) is arranged to support the belt (10) against a force (Fs) with which the sheets are pressed against the belt.
