Abstract (en)
[origin: US2020071072A1] A bag, such as a shipping bag, has an opening edge of a front wall present below an opening edge of the rear wall, so that the rear wall forms a protruding closing flap that can be folded over onto an overlapping area. The closing area has a first adhesive strip on the inner side of the rear wall, and the front wall has a third adhesive strip on the outer side on the other side of the overlapping area with the folded-over closing area. Also disclosed is a method for collecting used aluminum coffee capsules and a method for recycling used aluminum coffee capsules. The present disclosure further relates to use of the bags of the present disclosure for collecting and shipping used aluminum coffee capsules.
