Abstract (en)

[origin: WO2018202852A1] The invention relates to a foodstuff having a fibrous structure comprising: - at least one plant constituent of aquatic origin selected from among micro-algae or micro-algae extracts, cyanobacteria or cyanobacteria extracts and marine fungi or marine fungi extracts of the genus Schizochytrium and Auriantochytrium, or a mixture of at least two of these constituents of aquatic origin, and - at least one other plant constituent, said constituent of aquatic origin or the mixture of at least two of said constituents of aquatic origin constituting at least 5% by weight of the foodstuff. The invention also relates to the use of such a foodstuff as a substitute for a meat food product.
