Abstract (en)

[origin: WO2018166877A1] The invention relates to a cartridge for a fragrant composition supported on a divided solid carrier, comprising a peripheral wall (22) that is wider than it is deep, having a main opening closed by an airtight cover (24), said peripheral wall (22) having apertures distributed over at least a portion of the peripheral wall, said apertures being arranged to allow air to pass through the peripheral wall (22), in contact with said fragrant composition carrier while retaining said fragrant composition carrier within the cartridge. The invention also relates to a device for diffusing perfumed air, suitable for receiving at least one such cartridge.
