Abstract (en)

[origin: WO2018203254A1] An electric radiator (1) for space heating comprises a body (2) provided with an inner cavity (3) and outer heat exchange surfaces (4); an electric power heating element (5) housed in the cavity (3); an electric power supply connection (6) connectable to an external power network; and a control unit (7) connected to the power supply connection (6) and to the heating element (5) for controlling the power supply of the heating element (5); the control unit (7) includes a power controller (9), configured to detect the power supplied to the heating element (5) and to operate, when it detects a power supplied to the heating element (5) greater than a preset threshold value, to limit the energy supplied to the heating element (5).
