Abstract (en)  
[origin: WO2018202364A1] The present invention relates to a refrigerator (1) comprising a body (2), at least one door (3) enabling accessing into the body (2), a rear wall (4) provided on the back side of the cooler/freezer compartments in the body (2), two side walls provided opposite each other on both sides of the cooler/freezer compartments, at least one shelf (5) provided in the body (2), on which the food products to be cooled/frozen are placed, two shelf supports (6) fixed on the right and the left edges on the lower surface of the shelf (5), extending in perpendicular direction to the rear wall (4), at least one column (8) extending on the edges of the rear wall (4), guiding the shelf (5) so as to be movable upwards or downwards, and a height adjustment mechanism (10) enabling adjusting the level of the shelf (5) in the body (2).
