Abstract (en)

[origin: WO2018201172A1] The invention relates to a housing (1) for a firearm with an exchangeable barrel, comprising a bushing (2) in which the barrel root (3) of the exchangeable barrel can be inserted in the axial direction. The bushing (2) has a slot (7) in the axial direction and a clamping device (8) for adjusting the slot (7) from a starting position into a narrowed position, and the bushing (2) is designed to receive the barrel root (3) in a press-fitting manner when the slot (7) is in the starting position, which is uninfluenced by the clamping device (8), and has a spreading device (17) for moving the slot (7) from the starting position into an expanded position.
