Abstract (en)  
[origin: WO2018202913A1] The invention relates to an electronic accordion (1), comprising a treble side (2) and a bass side (3) and a bellows device (4) connecting the treble side (2) to the bass side (3), which bellows device defines a bellows volume (5), wherein: the treble side (2) and the bass side (3) can be moved relative to one another causing a change in the bellows volume (5); a first group (6) of keys (12) is arranged on the treble side (2) and a second group (7) of keys (12) is arranged on the bass side (3); and at least one resistance device (8, 25) having at least one resistance element (10) is provided and is designed at least partially to open or to close at least one opening (9) in the bellows device (4) as a function of a position of the at least one resistance element (10).
