Abstract (en)
[origin: EP3620587A1] A corner block and a block kit including the corner block are disclosed. The corner block includes an upper convex structure formed on a top face of the corner block, extending along a length direction of the top face and having the same length as that of the top face; and a lower concave structure formed on a bottom face of the corner block and configured for accommodating the upper convex structure. The upper convex structure includes a pair of guiding faces formed by extending inclined from the top face, as well as a connecting face connecting the guiding faces.
