Abstract (en)
[origin: WO2018206898A1] The invention relates to a system (10) for mixing two cosmetic products, the system (10) comprising a tubular bottle (14) which defines a first reservoir (16) that contains a first product (12) to be mixed, a tubular cartridge (32) which defines a second reservoir (34) containing a second product (13) to be mixed, the system (10) comprising a retaining device (56) which is suitable for retaining the cartridge (32) on the bottle (14) in an injection position in which the first reservoir (16) communicates with the second reservoir (34) via the inlet orifice (28) of the base (26) and the injection orifice (38) of the cartridge (32), a perforator (44) which has an upper edge (46) designed to perforate the cap (30) that seals the inlet orifice (28) of the base (26) when the cartridge (32) occupies its injection position, a piston (50) that seals the lower end (40) of the cartridge (32) and that is axially slidably mounted, between an initial bottom position and a final top position, in order to push the second product (13) through the injection orifice (38) of the cartridge (32), from the second reservoir (34) to the first reservoir (16).
