Abstract (en)
[origin: WO2018206985A1] An antioxidant dietary supplement composition comprises grapeseed extract and green tea extract, wherein the grapeseed extract is present in the composition in an amount of from 40% to 60% by weight based on the total weight of the grapeseed extract and green tea extract and the green tea extract is present in the composition in an amount of from 60% to 40% by weight based on the total weight of the grapeseed extract and green tea extract. Preferably, the composition additionally contains at least one substance selected from pine bark extract and pomegranate extract. A particularly preferred composition comprises from 37 to 42% by weight of grapeseed extract, from 32 to 37% by weight of green tea extract, from 7 to 15% by weight of pine bark extract and from 7 to 15% by weight of pomegranate extract, wherein the % by weight is based on the total weight of the grapeseed extract, green tea extract, pine bark extract and pomegranate extract in the composition. The composition has use in the treatment of viral infections, especially respiratory infections, in mammals and birds, especially in humans, horses and camels. Also disclosed is a method of treating a viral infection in a mammal or bird which comprises administering to the mammal or bird a composition according to the invention.
