Abstract (en)

[origin: WO2018206263A1] The invention relates to a device and method for the 3D printing of a workpiece made of a rubber-like non-thermoplastic material, comprising an extruder (1), which has a component feed connection (2) and a nozzle (3), an actuator (4), which is connected to the extruder (1), and a control unit (5) for controlling the extruder (1) and the actuator (4) in such a manner that a plurality of material layers (6, 7) are applied for forming a workpiece (8) that is to be printed.
