Abstract (en)  
[origin: WO2018204946A1] The invention relates to a furniture hinge (6) for the pivotable connection of a first furniture part (3a) to a second furniture part (3b), comprising: a first fitting (11) for fastening to the first furniture part (3a), a second fitting (12) for fastening to the second furniture part (3b), wherein the second fitting (12) is pivotably connected via at least one hinge axis (13) to the first fitting (11), wherein the first fitting (11) has a base plate (11a) to be fastened to the first furniture part (3a) and a coupling piece (14) pivotably mounted around the hinge axis (13), wherein the coupling piece (14) may be detachably connected to the second fitting (12), wherein the second fitting (12) has at least one guide device (21a) for guiding the coupling piece (14), wherein the coupling piece (14) may be detachably connected to the second fitting (12) by a second locking device (19) once the coupling piece has been pushed or pressed onto the guide device (21a); a first locking device (15) being provided, by means of which the coupling piece (14) can be detachably locked in a predefined pivot position relative to the base plate (11a), and the first locking device (15) may be unlocked to release the predefined pivot position of the coupling piece (14) relative to the base plate (11a) by connecting the coupling piece (14) to the second fitting (12).
