Abstract (en)  
[origin: WO2018204947A1] The invention relates to a guide system (5) for guiding at least one movably mounted door leaf (3b), comprising: - a first guide rail (6), - at least one guide carriage (8), which may be connected to the at least one door leaf (3b) and which is mounted so as to be able to travel along the first guide rail (8), - a second guide rail (11), which is formed separately from the first guide rail (6) and which, in the installed state, runs transverse to the first guide rail (8), - a support (14), which is mounted to be displaceable relative to the second guide rail (11) and on which the at least one guide carriage (8) may be arranged. - a transfer device (15), with which the at least one guide carriage (8) may be transferred at least from the first guide rail (6) onto the support (14), wherein the transfer device (15) has at least one control contour (21) which is bent at least in sections such that the at least one guide carriage (8) may be moved at least in sections in the direction (Z.) of the second guide rail (11) on transfer from the first guide rail (6) onto the support (14).
