Abstract (en)
[origin: WO2018206323A1] The present invention relates to a cooling device (1) comprising a body (2); at least one shelf (3) arranged on the lateral walls of the body (2) for placing the foodstuffs to be cooled thereon; a door (4) that prevents user access to the interior of the body (2) in the closed position and enables the user to access to the interior of the body (2) in the open position, and a door shelf (8) that is arranged on the inner wall of the door (4) and that has a base (5), a first side wall (6) extending perpendicular to the base (5) at the side of the door (4) wherein the door (4) is hinged to the body (2) and a second side wall (7) that is arranged on the other end of the base (5) oppositely to the first side wall (6), wherein the base, the first side wall (5) and the second sidewall (7) define a storage space for placing the foodstuffs.
