Abstract (en)
[origin: WO2018206549A1] The invention relates to a system (1) for machining workpieces (W), which preferably consist, at least in some sections, of wood, wood materials, plastic or the like, comprising: a machining device (B1, B2, B3) for carrying out the workpiece machining, which machining device has a control apparatus having a data transfer interface; and a terminal (10), which has a data transfer interface, which is designed to communicate with the data transfer interface of the machining device (B1, B2, B3) by means of a data connection (15). The control apparatus is designed to forward state information of the machining device (B1, B2, B3) to the terminal (10) via the data transfer interface.
