Abstract (en)

[origin: WO2018206844A1] Embodiments of the present invention generally relate to routing and policy management in wireless networks. In particular, embodiments described herein relate to routing and policy management in radio access networks (for example, 5G or the like) and other, for example, existing or future generations of wireless/mobile networks and, specifically to a method, apparatus, and computer program product for routing and policy management at the network edge.
