Abstract (en)
A system is provided for making packages (1000) comprising a bag (100) of flexible material comprising a first face (101) and a second face (102) and a folded element (200) folded along a folding line (203), wherein the folding line (203) is parallel to the upper end (103) of the bag (100) and divides the folded element (200) into a first portion (201) and a second portion (202) so that the first portion (201) extends along the first face (101) and the second portion (202) extends along the second face (102). A method for making such packages is also presented.
