Abstract (en)
A device (1, 11) is described for terrorism protection of roads, squares and the like with a road surfacing (4), which device comprises an upper part (2, 12) that is arranged to project above the road surfacing (4), and a lower part that is suitable to extend below the road surfacing, wherein the lower part comprises one or more tilting protections (7, 8, 17, 18) that are rigidly connected with the upper part of the device and extend horizontally in one plane in parallel with the road surfacing and has a largest extent in this horizontal plane in the range of 60 to 250 cm, preferably in the range of 75 to 200, such as in the range of 85 to 150 cm. Furthermore, a protection arrangement is described, comprising several of such devices as well as the use of such devices or protection arrangements for terrorism protection of an area.
