Abstract (en)

[origin: WO2018210458A1] The invention relates to a mop head, comprising a support body (1) and textile fringes (2) that extend in the longitudinal direction (3), wherein the fringes (2) are attached in the longitudinal direction (3) to the support body (1) and have an opposite end (4) in the longitudinal direction (3), wherein at least one fringe (2) comprises at least two strands (5, 6) with a first strand (5) and a second strand (6), wherein the strands (5, 6) directly contact and rest against one another, wherein each strand (5, 6) has the same length (9) as a result of the manufacturing process, wherein when water and/or heat is applied during normal use of the mop head, the strands (5, 6) have differing shrinkage properties in the longitudinal direction (3) as a result of material properties and wherein the strands (5, 6) are fixed to each other by means of at least one fixing means (10) in the longitudinal direction (3) in such a manner that the strands (5, 6) are kept at the same length (9) during normal use of the mop head.
