Abstract (en)

[origin: WO2018210594A1] The invention relates to a water-bearing domestic appliance, in particular a dishwasher, comprising a moving component, an electric motor for moving the component, a control apparatus for actuating the electric motor and a load apparatus for providing a resistance which is dependent on a position of the moving component and opposes the movement, wherein the control apparatus is designed to detect the drive current which is drawn by the electric motor and is dependent on the provided resistance and to ascertain the position of the moving component as a function of the detected drive current.
