Abstract (en)

[origin: WO2018210471A1] The invention relates to a sulfur-crosslinked rubber mixture for vehicle tires, containing carbon nanotubes (CNTs), to a vehicle tire having the sulfur-crosslinked rubber mixture, and to a method for producing the sulfur-crosslinked rubber mixture containing CNTs. The sulfur-crosslinked rubber mixture according to the invention is characterized in that the CNTs are pre-dispersed in at least one polyisoprene. The vehicle tire according to the invention has the sulfur-crosslinked rubber mixture preferably in the tread and/or a sidewall and/or a conductivity strip.
