Abstract (en)  
[origin: US2019101553A1] A slide rack carousel is provided that includes a base that is configured to support a plurality of slide rack spacers that extend upward from an upper surface of the base. Adjacent slide rack spacers define a slide rack slot of a predetermined size. The plurality of slide rack spacers may include slide rack spacers of varying sizes and therefore a plurality slide rack slot sizes can be selectively configured on the carousel in accordance with the positioning and size of the plurality of slide rack spacers that are attached to the base of the carousel. Accordingly, a desired number of 1×3 slide rack slots and a desired number of 2×3 slide rack slots can be configured on the base of the slide rack carousel.
