Abstract (en)
[origin: WO2018210373A1] The invention relates to a holding frame (1) for accommodating a circuit board (5), wherein the holding frame (1) has a substantially rectangular basic shape and has two holding arms (3) sticking out perpendicularly from the frame plane, each holding arm having a groove (3) in which the circuit board (5) can be held. A circuit board can thus be integrated in a heavy-duty plug connector (10) in a mechanically stable yet low-wear manner.
