Abstract (en)
[origin: CN110934539A] A suction device (12) includes: a motor housing (13); a suction motor (15) disposed in the motor housing (13) and configured to generate suction flow; and a pneumatic sealing element (18) including a first annular sealing portion (19) and a second annular sealing portion (21), the first annular sealing portion (19) being configured to sealingly cooperate with the motor housing (13), and the second annular sealing portion (21) being configured to hermetically cooperate with the suction motor (15). The first annular sealing portion (19) covers and is molded on the motor housing (13) and includes an annular sealing protrusion (28), the annular sealing protrusion (28) extending around a through opening (14) and configured to sealingly cooperate with the housing (3) of a household vacuum cleaner.
