Abstract (en)

[origin: WO2020057944A1] The invention relates to an elastic retaining member (1) for attaching a timepiece component (2) to a support element (3), comprising an opening (5) into which said support element (3) can be inserted, the retaining member (1) comprising rigid arms (6) and elastic arms (7) defined between connecting zones (9), helping to ensure elastic clamping of the support element (3) in the opening (5), and each rigid arm (6) being provided with two flat contact zones (8) of the retaining member (1), which can interact with corresponding convex contact portions (10) of the support element (3).

Abstract (fr)

L'invention concerne un organe de maintien élastique (1) pour la fixation d'un composant d'horlogerie (2) sur un élément de support (3), comprenant une ouverture (5) dans laquelle est susceptible d'être inséré ledit élément de support (3), l'organe de maintien (1) comprenant des bras rigides (6) et des bras élastiques (7) contribuant à assurer un serrage élastique de l'élément de support (3) dans l'ouverture (5) chaque bras rigide (6) étant pourvu de deux zones de contact (8) plates de l'organe de maintien (1) aptes à coopérer avec des portions de contact (10) convexes correspondantes de l'élément de support (3).
