Abstract (en)
[origin: WO2018203018A1] A fluid product dispensing module (M) intended to be incorporated into a fluid product dispensing head mounted on a fluid product reservoir, the fluid product dispensing module (M) comprising a fluid product inlet (13), a dispensing orifice (50) and a fluid product flow path (Cp) between the fluid product inlet (13) and the dispensing orifice (50), the dispensing module (M) further comprising a valve (3, 20) that selectively shuts off said fluid product flow path (Cp), said valve (3, 20) opening under a determined pressure of the fluid product in the fluid product flow path (Cp) upstream from the valve (3, 20), characterised in that it further comprises a vent path (Ca) for venting the fluid product reservoir.
