Abstract (en)
The invention provides a process for preparing iron- and chrome-containing pellets comprising the steps a) producing ore pellets comprising mixing chrome ore material, Chrome Ore Process Residue (COPR) with less than 3 % of a carbonaceous reductant components selected from anthracite, char, coke and bituminous coal, b) optionally drying the ore pellets obtained after step a), and c) calcining the ore pellets, as well as novel iron- and chrome-containing pellets obtainable by said process.
