Abstract (en)
[origin: US2020103087A1] A single-piece optical part made of transparent or translucent material, comprising a plurality of active surfaces arranged to form a beam, including an entrance dioptric interface and an exit dioptric interface, inactive surfaces joining the active surfaces, at least one of the inactive surfaces comprising a scattering segment so as to scatter the rays that reach it.

Abstract (fr)
La présente invention se rapporte à une pièce optique (1) monobloc en matériau transparent ou translucide comprenant :- une pluralité de surfaces actives agencées pour mettre en forme un faisceau, dont un dioptre d'entrée et un dioptre de sortie (5), - des surfaces inactives (6) joignant les surfaces actives, au moins une des surfaces inactives présentant une portion diffusante (7) de manière à diffuser les rayons qui l'atteignent.
