Abstract (en)  
[origin: WO2018215006A1] The invention relates to a support to be applied in a corner in particular covered with wall tiles, which support has an overlay for a tile and two parts projecting relative to the tile for introduction in particular into a joint extending over the corner, wherein an angled portion (4) at least partially covering the edge of the overlying tile (3) is connected to at least one free side (5) of the overlay (2), the angled portion (4) is formed integrally with the overlay (2), and in a view from above the two projecting parts (9, 10) project over the overlay (2) and the angled portion (4) in each case by less than the thickness of a wall tile (11, 13; 12, 14).
