Abstract (en)
[origin: WO2018219989A1] A machine (1) has a unit for preparing and dispensing via an outlet (36) a beverage. The machine includes: an outside housing (30) with one or more outside faces (30a,30a',30b,30c,30d); and at least one placement member (30e) for resting onto a generally flat external support surface (5) in a configuration such that the unit is in an orientation for preparing and dispensing the beverage via the beverage outlet (36) to a beverage dispensing surface (5,37). At least one placement member (30e) is movable and has: a deployed placement position providing a stability of the unit in this orientation on the external support surface (5); and a retracted rest position within the outside housing (30) or collapsed against the outside housing (30).
