Abstract (en)

[origin: WO2018215091A1] The invention relates to a method for producing multi-unit strips (20). Multi-unit portions (21) are created on an intermediate carrier (30), wherein the multi-unit portions (21) are provided in order to be applied on a multi-unit region of the target substrate. Two outer portions (22) for each multi-unit portion (21) are created on the intermediate carrier, wherein the two outer portions (22) are provided in order to be applied to outer regions of the target substrate. The two outer portions (22), together with the multi-unit portion (21), form a multi-unit strip. Pre-structuring of the two outer portions (22) of the multi-unit strip (20) on the intermediate carrier for the applying of the multi-unit strip (20) to the target substrate. The intermediate carrier is an intermediate carrier web (30), on which a plurality of the multi-unit strips (20) are created adjacent to each other. The intermediate carrier web (30) is cut into a plurality of strip partial webs (32), on each of which a plurality of the prestructured multi-unit strips (20) are arranged one behind the other according to length.
