Abstract (en)
[origin: CA3065635A1] The invention relates to a boat comprising a flexible bottom (10) bordered radially towards the outside by a wall (20) which comprises an inflatable and flexible front wall (21), an inflatable and flexible lateral wall (22), and a rear wall (23). At least one part of at least one of the lateral wall (22) and of the front wall (21) is constituted by a first inflatable element (30) configured as a panel having two parallel planar faces (31, 32), a second inflatable element (40) of which the cross section is in the form of a D with a planar portion (41), and a flexible assembly device, the second element (40) being situated radially towards the outside of the boat with respect to the first element (30), the assembly device maintaining the planar portion (41) of the second element (40) in contact with one of the planar faces of the first element (30).
