Abstract (en)

[origin: WO2018219598A1] The invention relates to a stator module (100, 410, 420, 430) for a linear drive of a container-handling machine in the beverage-processing industry, comprising a housing in which a core (341) and at least one coil (342) are arranged, wherein the stator module comprises a media supply (130) for feeding a gas into the interior of the housing, and the media supply (130) is designed to apply excess pressure to the interior of the housing, as well as to a corresponding container-handling machine and to a method for operating a container-handling machine.
