Abstract (en)
[origin: WO2018220030A1] What are described are a process for producing an insulating product for the building materials industry or an insulation material as an intermediate product for the production of such a product, and a corresponding insulation material or an insulating product. What are further described are the use of a matrix encapsulation method for producing composite particles in the production of an insulating product for the building materials industry or of an insulation material as an intermediate product for the production of such a product and the corresponding use of the composite particles producible by means of a matrix encapsulation method.
