Abstract (en)
[origin: WO2018215393A1] The present invention relates to liquid crystalline (LC) medium, to a method of its production and to the use of such LC media in polymer network liquid crystalline (PNLC) light modulation elements, preferably operated in the ECB mode. Furthermore, the present invention relates to such light modulation elements, as such, to the use of such light modulation elements in electro-optic devices, in particular in LC displays, and to a method of production of such light modulation.
