Abstract (en)
[origin: WO2018219627A1] The present invention relates to a laundry treatment appliance (100) comprising a controller (105) for controlling the laundry treatment appliance (100), wherein the controller (105) can be connected to a user apparatus (117) for outputting a message to a user of the laundry treatment appliance (100). The controller (105) can be connected to a program selection device (107) for selecting a plurality of laundry treatment programs. The controller (105) is designed to record user washing behaviour of the user of the laundry treatment appliance (100) during a reference time period. The user apparatus (117) is designed to instruct the user to select at least one laundry treatment program, depending on the recorded user washing behaviour, during a washing time period following the reference time period.
