Abstract (en)
[origin: WO2018216046A1] Iron (10) comprising a tank (11), a base (12) provided with a plate (13) and a containing body (14) associated with the plate (13), said base (12) defining a chamber (19) connecting the tank (12) to the plate (13) and in which, during use, the water coming from the tank (11) contacts a heated surface (20) of said chamber (19) in a contact zone (21) in order to generate steam, wherein there is a removable anti-limescale device (22) able to accumulate and remove the limescale from inside the iron (10) and defining the path of the steam toward the plate (13).
