Abstract (en)

[origin: WO2018219408A1] The invention relates to a sanitary fixture comprising a sensor fitting (1) which is supplied with power for carrying out a hygienic flushing and which comprises: a first signal processing communication unit (1.1) and an electrically actuable valve (2) that can close automatically without a power supply; and a second signal processing communication unit (2.1) and a power supply (2.2), the sensor fitting (1) and the valve (2) being fluidically connected via a water pipe (3) and the two communication units (1.1, 2.1) being connected to transmit information. According to the invention, in order to ensure a hygienic flushing function when the power supply (2.2) is switched off, the water pipe (3) is provided with a pressure sensor (4) connected to the first communication unit (1.1) and the valve (2) is provided with an auxiliary power supply (2.3).
