Abstract (en)

[origin: WO2018219752A1] The invention relates to a motor vehicle having at least one vehicle side, on which a front door and a rear door are provided, and to a method for operating an electric motor in a respective rear door of the at least one vehicle side. The invention relates to a motor vehicle (10) having at least one vehicle side (11), on which a front door (12) and a rear door (13) are provided, wherein an electric motor (17) for a motorized door function (16) is provided in the rear door (13) and wherein a control device (32) is provided for operating the motor (17) which is connected to the motor (17) via electrical conductor elements (33) for transferring a motor current (I0). According to the invention, the control device (32) is arranged in the front door (12) and is designed to also control at least one door function (25, 30) of the front door (12).
