Abstract (en)
[origin: WO2018215931A1] Automatic sliding door of the type comprising a frame or casing (2) which is fixed on the door opening at least one fixed leaf (3, 3') and a sliding leaf (4, 4') which, when in a closed position, prevents access through the door opening and, when in an open position, substantially overlaps the fixed leaf leaving part of the door opening open. One portion of a leaf comprises an electronic display device (5) for visual communications controlled by an electronic processing unit that allows it to project predetermined information.
