Abstract (en)
[origin: WO2018215022A1] The invention relates to an appliance and an electromechanical closing device for appliance doors (27), particularly for device doors (27) of heating appliances, wherein the closing device (01) comprises a lock (02) for receiving and securing a closure element (04), particularly a door-side element, having at least two closing stages and an actuator (03) for transferring the lock (02) into at least a part of the various closing stages, and wherein the actuator (03) and the lock (02) are executed as separate structural units spaced apart from each other and the actuator (03) is connected to the lock (02) by a connecting element (05).
