Abstract (en)

[origin: EP3632637A1] The invention relates to a food cutting machine and to a cutting method, the machine comprising a head (2), a tray (3) on which a food item (1) is available, first conveying means that move the tray (3) in at least one direction (x'), and second conveying means that move the head (2) in two other directions (x,y) and according to a cutting area (A) smaller than the surface of the tray (3), such that both conveying means simultaneously move the tray (3) and the head (2) along at least one cutting path, the tray (3) and the head (2) being moved in opposite directions and towards each other, such that a part of the cutting path is covered by the movement of the tray (3) and the other part of the cutting path is covered by the movement of the head (2).
