Abstract (en)  
[origin: WO2018226136A1] A tablet dispenser (10) is provided. The tablet dispenser (10) comprises body (11) having a base (11a) for resting on the underlying foundation in use. The body (11) comprises a tablet drop channel (12) extending in a direction at an angle ( $\theta$ ) relative a base plane formed by the base (11a) and a support structure (13) for accommodating at least two tablet cartridge units (15) arranged one above the other in relation to the base (11a). Each tablet cartridge unit having an opening (158) allowing a tablet from the associated tablet cartridge unit (15) to be released into the tablet drop channel (12) by means of gravitational force, whereby each tablet cartridge unit (15) is inclined at an angle ( $\alpha$ ) relative the base plane.
