Abstract (en)
[origin: WO2018224851A1] Chair for work place environment or for means of transportation that is capable of providing physical training. The subject of the invention is such chair that used for lasting period of times, encourages muscular physical work and can even be utilized during office work hours, or during travel, and as it requires, the daily training can be performed on it. The principal idea of the invention is that certain parts of the chair shift, or signal and the sitting person has to produce muscular force against those actions. Usage of this kind of chair can save the supplemental time one should spend during leisure time, because physical training can be done while sitting on this chair. The chair can be controlled by smart device, or computer, hence a variety of training schemes can be offered for selection.
