Abstract (en)

[origin: WO2018226291A1] The present invention provides for a packaging system having an insert, preferably for securing a personal care product, wherein the insert is inserted into an outer sleeve. The outer sleeve has a window on the front side biased toward the top of the front side to maximize a continuous area for messaging in the non-window portion of the front side. The is particularly advantageous in a trapezoidal profiled packaging systems to maximize the continuous area for messaging.
