Abstract (en)
[origin: WO2018215888A1] Device for treating wastewater, comprising: a substantially watertight tub; - an inlet for supplying wastewater to the tub; an outlet for discharging wastewater from the tub; granular substrate which substantially fills the tub, wherein the granular substrate comprises at least 90% granules with a granule size greater than 1 mm and smaller than 120 mm; - an air feed provided at the position of a bottom of the tub; wherein a pressure-distributing layer with a substantially flat finishing layer is provided on the granular substrate at the position of an upper segment of the tub, such that the device can be walked on.
