Abstract (en)

[origin: WO2018224267A1] The present invention relates to a bearer (3) having at least two electrodes (4) enabling detecting the dryness level of the laundry items by contacting the laundry items, and a communication unit (5) allowing transmitting the dryness level data, a washer-dryer (1) operating in communication with said bearer (3), comprising a drum (2) rotated about a rotational axis, in which the laundry items to be dried and the bearer (3) are placed, a water spraying device (8) enabling spraying water into the drum (2) and the controlling method used to operate said washer-dryer (1).
