Abstract (en)

[origin: WO2018224502A1] The invention concerns a lower cross-member (100) for the construction of a stationary frame of a sliding window or door/window, said lower cross-member (100) comprising a profile having a drainage rebate on which a liquid can accumulate and intended to engage with at least one sliding opening frame of said sliding window or door/window. In addition, said lower cross-member (100) comprises an electric pumping system configured to remove a liquid accumulated on said drainage rebate from the stationary frame.
