Abstract (en)
[origin: WO2018224309A1] The invention relates to a centrifugal pump for conveying hot media. The centrifugal pump comprises at least one impeller wheel (9) which is mounted in a pump housing (1). The impeller wheel (9) is set in rotation by a drive via a shaft (7). A housing assembly (4) for dissipating heat adjoins the pump housing (1). The shaft (7) is provided with a face seal assembly (16). The shaft (7) is also supported with at least one bearing (10, 25). According to the invention, the centrifugal pump comprises a compact module (15) in the form of an assembly unit. The module (15) comprises at least one face seal assembly (26) and at least one bearing (25).
